

Grow your  
business with

**Buddy**<sup>CRM</sup>

The easy to  
use online CRM  
software for  
sales teams.

# Hello

WE LIKE TO THINK OF **BUDDYCRM** AS THE CHAMPION OF SALES TEAMS THROUGHOUT THE UK AND PRIDE OURSELVES ON THE LEVEL OF SUPPORT WE PROVIDE.

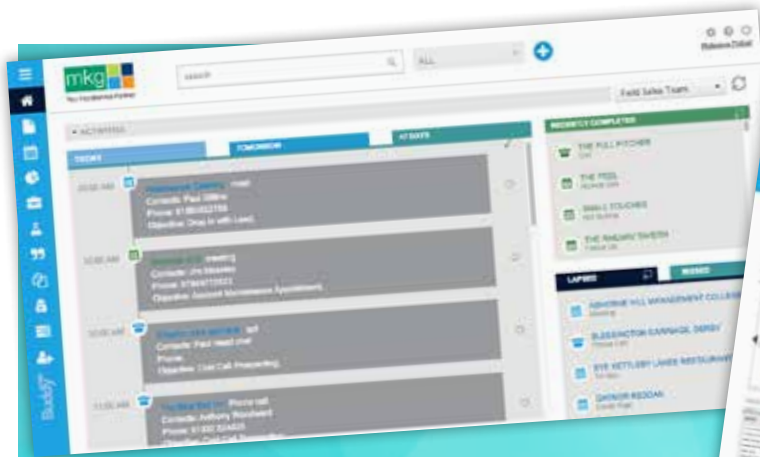

We know from first-hand experience that putting a customer relationship tool into your workplace can be a challenging experience. That's why we started BuddyCRM - as a response to the terrible interfaces and low levels of support in the CRM industry. **BuddyCRM was built by sales professionals for sales professionals.**

#### BuddyCRM has:

- Contact and Account Management
- Opportunity Management with Sales Pipeline
- Single Customer View with emails (and attachments!)
- Targeted Email Marketing
- Reporting
- KPIs
- Calendar
- Quotes
- Integration with other systems

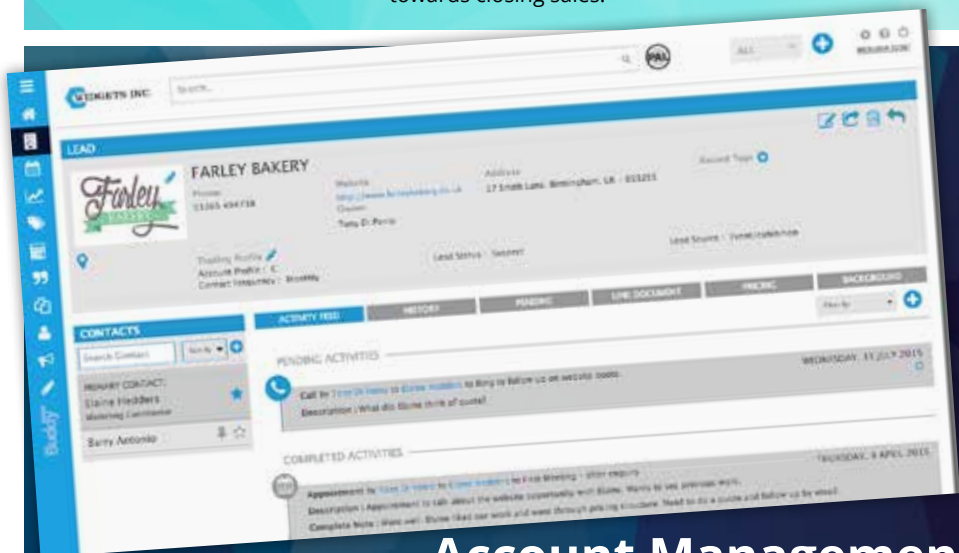

#### BuddyCRM is:

- Your sales assistant on the road, enabling you to update appointments and contact information as you go.
- Your connection with sales team members
- Your connection to your customers in your marketing efforts
- Your appointment setting tool

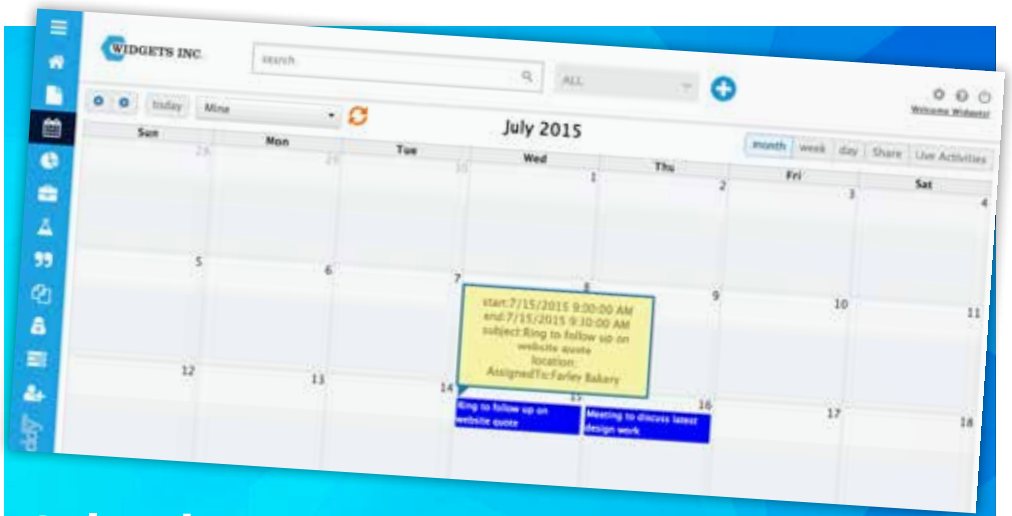

## Dashboard

- Personalise the Buddy home screen dashboard with as much or as little information as you require.
- Check your diary quickly with Today, Tomorrow and 7 Days forward agendas.
- See your lapsed, missed and recently completed activities. Get a quick overview of your progress towards sales targets, see your opportunities and review your progress towards closing sales.
- Add charts, reports, and tables on your Leads, Accounts, Sales, Opportunities and Activities.

## Account Management

- Store all your notes, appointments, phone calls, tasks and emails about your contacts as well as important documents relating to your clients and prospects in one place.
- Prepare for your sales call or appointment in advance with a single glance at your customer's record. Never be unprepared again.

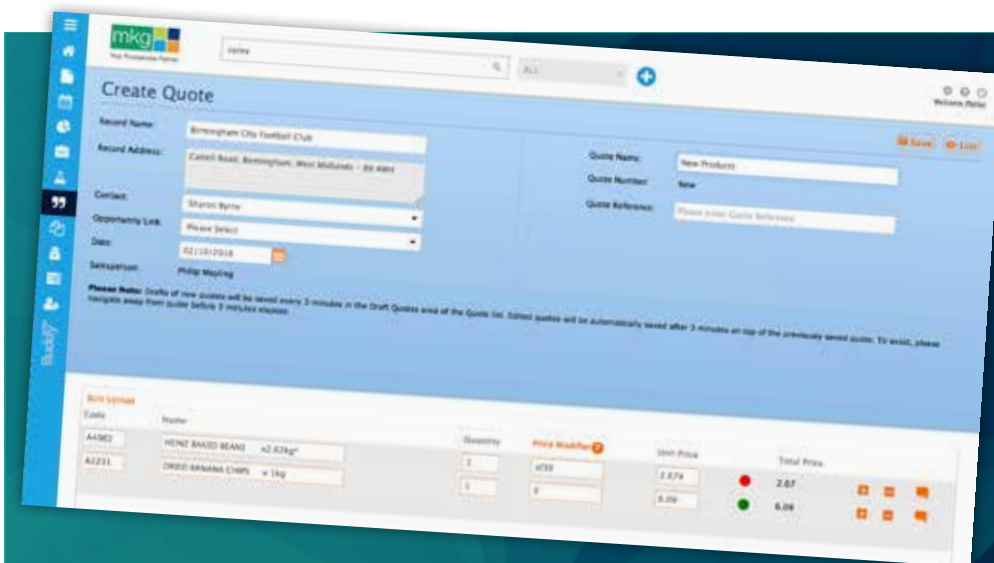

## Calendar

- Keep a company wide calendar with all activity shown including appointments, calls and tasks.
- Centrally managed appointment setting teams can schedule your sales teams time by time by from the app at head office.
- Control who sees what by defining groups of sales teams in regions, areas, and by seniority level.

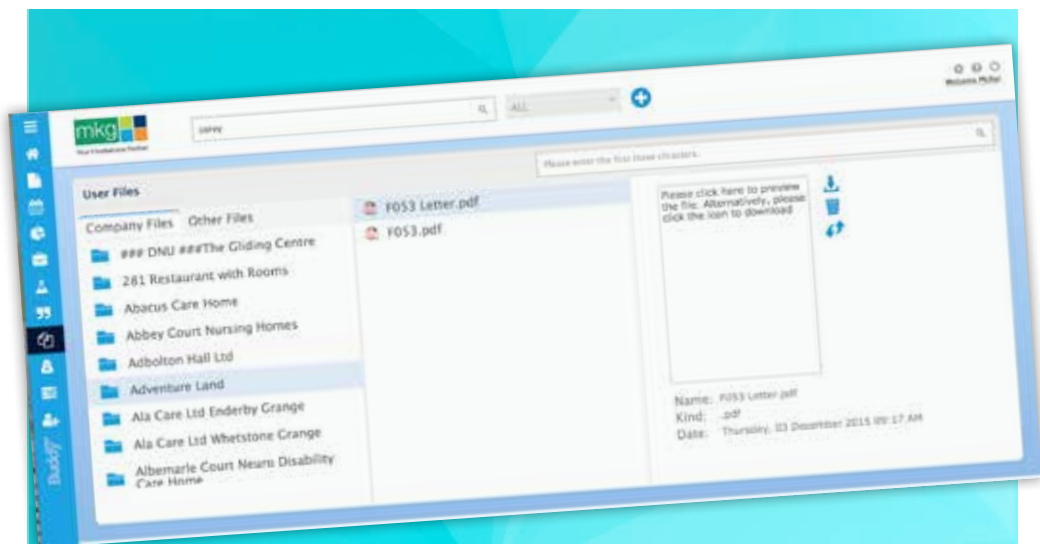

## Reporting

- Deliver the right information for management to make decisions.
- Build your own reports or use the built-in ones available including sales, leads, opportunities, account, and contact reports.
- Dive into the data to pick out best practice by your sales team members, check whether targets are being hit, budgets are accurate and accounts are regularly being contacted.

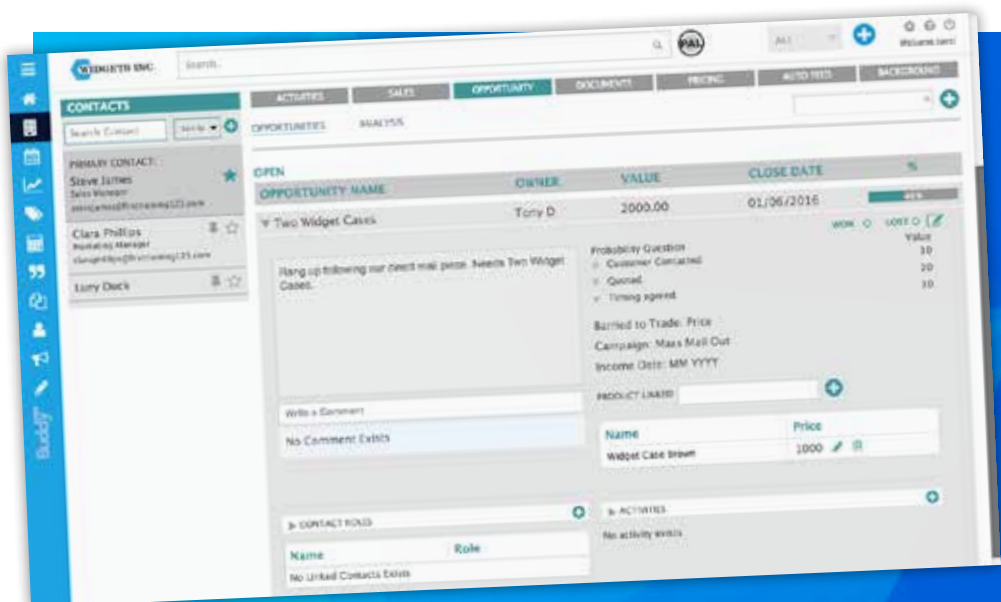

## Quotes & Presentations

- Store images, product specifications, build elegant presentations and create and save beautiful quotations without having to leave the system.
- Quickly create documents that can be shared with the team and wow your clients with up to date information.

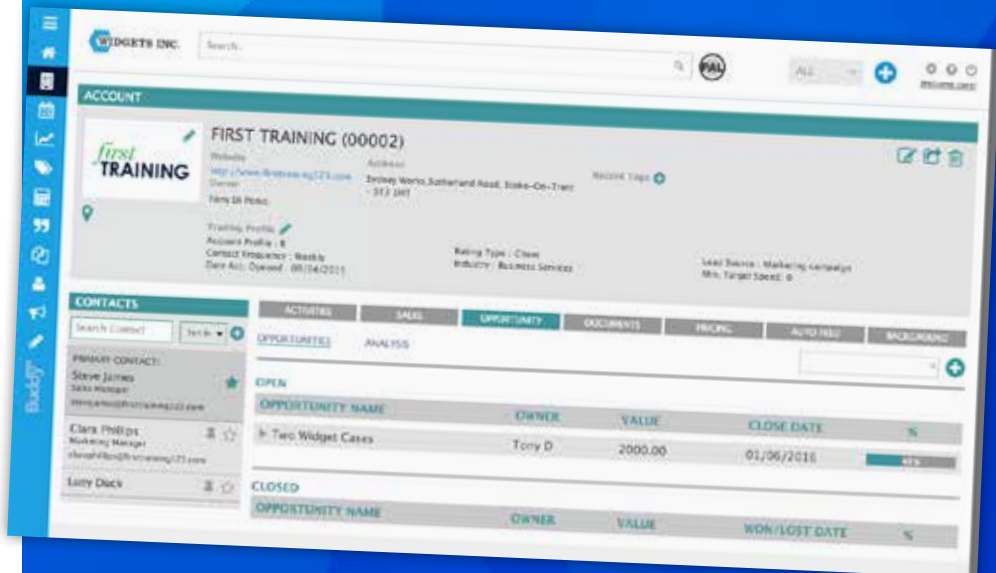

## File Management

- Store key files and documents for the team in a central repository.
- Available to all or set security by group or individual to enable access.

## Sales Pipeline & Deal Management

- Manage your opportunities and deals from initial meeting through the sales pipeline to close.
- Create multiple deals with custom milestones, trigger automatic follow-ups, get real-time deal metrics and predict future revenue.
- No matter how big your sales team is, you'll benefit from a clear understanding of where your team is with their customers in the buying cycle.

## Email Marketing

- Buddy CRM connects to Mailchimp and Pure360, industry leaders in email marketing.
- Your data syncs automatically to their lists so you can send campaigns to the exact target group of prospects from your your customer records.

## Mobile App

- Following your meeting, update the opportunity directly in the BuddyCRM IOS app and have it instantly available to the other members of your sales team.
- The BuddyCRM app is quick, simple and easy to use with all your history and planned activities available with a quick swipe.

# sage

## Connect to other Data

- Use the Buddy API to bring in sales, accounts or any other data from other systems and have it shown right in the account record.
- You'll get a single customer view of everything that's happening with that account.

# The BuddyCRM difference

- **We're a UK based company** with support also based in the UK. We're not a faceless plc with a sales team based in India or Dublin. You can meet the BuddyCRM team at our offices in Lichfield and equally we're happy to visit you at your business. We'd love to discuss your sales processes and how to implement BuddyCRM in your sales team.
- **We care about the product and developed it to solve problems in our sales roles in our past careers.** It became so successful there that we had to turn it into a viable product for others. Our customers have become loyal 'buddies' and we're happy for you to contact them to discuss using BuddyCRM.
- **We want Buddy to succeed in your company** so we walk everyone through key steps to make sure that you've chosen the right system and everything is in place for success.
- **We're the right size for your organisation.** BuddyCRM fits firmly between the solutions for 1-2 sales people that have limited customisability and the complicated 'enterprise solutions' that take an age to learn and are full of features you don't need.
- **Works with your existing systems.** You won't have to change the systems you use to benefit from BuddyCRM. Our system is designed to work with your accounting package, email software and your marketing tools right out of the box so you can be up and running as fast as possible.
- **Customisable for the perfect fit.** We know all businesses are different so your working practises may need some unique features. We have a team of developers and will work with you to design and develop the features you need to enhance your BuddyCRM system.

# Why use a CRM?

## It's a centralised place for storing data.

A CRM provides a full, accurate record of a reps entire interaction history with a prospect that's accessible with one click.

## It improves communication across an organisation.

Shared information at all levels through your organisation means everyone is on the same page.

## CRMs make managers lives easier.

CRMs standardise how reps track their activities and prospect interactions, which streamlines reporting.

## It's a sustainable, scalable tool for growth.

Do you want to grow your business? Your ability to do so is dependent on contacting your prospects at the right intervals and providing them relevant information at the right time, and you simply can't do this effectively without a CRM.

## We run our business on a few key principles:

- Simplicity is the ultimate sophistication. As far as possible, no action in BuddyCRM should take more than 3 clicks.
- Users tend to perform the same 5% of features 95% of the time – therefore we make these features as easy to use as possible.
- Don't add features unless they really add something – feature creep makes systems bloated and complicated. Our niche is helping sales teams work more efficiently and giving sales managers improved visibility.
- Don't try to do everything. We believe medium sized businesses work best when they have 4-5 pieces of software, each with its own core strength such as sales processing, accounts, email marketing. Our software must easily integrate with all these, out of the box or with little added investment from the customer.
